- Services at Title X-supported centers helped women avoid 11,900 unintended pregnancies, which would have resulted in 5,800 births and 4,300 abortions.
- By preventing sexually transmitted diseases, cervical cancer, and unplanned pregnancies, Title X-supported centers in Minnesota saved \$93.5 million in public funds in a single year.
- From FY 2010 to FY 2017, the amount of federal funding Minnesota received for Title X decreased by \$476,267, resulting in 1,483 fewer (3%) patients served.
- In 2017, prior to the new Title X rule, 38 clinics in Minnesota received support from Title X. They included Planned Parenthood clinics (17), St. Paul-Ramsey County Department of Public Health (7), and other service sites (14).
- In August 2019, the new Title X rule went into effect, forcing some of Minnesota’s Title X grantees to exit the program. As a result, the state has lost 82% of its Title X funds.
