TITLE X FAMILY PLANNING SERVICES IN OREGON ^{iv}

- Title X–supported centers provided contraceptive care to 33,004 women in Oregon in 2019.⁵
- Services at Title X-supported centers helped women avoid 13,300 unintended pregnancies, which would have resulted in 6,500 births and 4,800 abortions.
- By preventing sexually transmitted diseases, cervical cancer, and unplanned pregnancies, Title X-supported centers in Oregon saved \$64.3 million in public funds in a single year.
- From FY 2010 to FY 2017, the amount of federal funding Oregon received for Title X decreased by \$489,000, resulting in 27,153 fewer (38%) patients served.
- In 2017, prior to the new Title X rule, 97 clinics in Oregon received support from Title X. They included health department clinics (63), school-based health centers (24), federally qualified health centers (6), and Planned Parenthood clinics (4).
- In August 2019, the new Title X rule went into effect, forcing Oregon’s sole Title X grantee to exit the program. As a result, the state is losing 100% of its Title X funds.
