TITLE X FAMILY PLANNING SERVICES IN IDAHO ^{IV}

- Title X–supported centers provided contraceptive care to 12,455 women in Idaho in 2019.⁵
- Services in Title X-supported centers helped women avoid 4,000 unintended pregnancies, which would have resulted in 1,900 births and 1,400 abortions.
- By preventing sexually transmitted diseases, cervical cancer, and unplanned pregnancies, Title X-supported centers in Idaho saved \$29.9 million in public funds in a single year.
- From FY 2010 to FY 2017, the amount of federal funding Idaho received for Title X decreased by \$509,297, resulting in 14,089 fewer (58%) patients served.
- In 2017, prior to the new Title X rule, 48 clinics in Idaho received support from Title X. They included health department clinics (45), other service sites (2), and Planned Parenthood clinics (1).
- In August 2019, the new Title X rule went into effect, forcing one of Idaho’s Title X grantees to exit the program. As a result, the state lost 11% of its Title X funding and only 32 clinics (federally qualified health centers) are receiving support from Title X.
